SAI VIKAS MALLADI

Adelaide, SA | 0416 130 046 | saivikasmalladi@gmail.com | linkedin.com/in/saivikasmalladi

PROFESSIONAL SUMMARY

Database Administrator and Master of Data Science graduate with experience in South Australian government administration, data quality, information governance and technical support. Skilled in validating and cleansing structured records, supporting CRM and database-related applications, and documenting issues and workflows in compliance-focused environments. Brings additional experience in business operations and practical data analysis using Excel, SQL, Python and Power BI.

CORE SKILLS

Data and information management: Data cleansing and standardisation; data validation; records accuracy; document management; archiving and information governance.

Technical and analytical: Microsoft Excel (pivot tables, lookups, filtering and data validation); SQL; Python; pandas; Power BI; Tableau; ETL and reporting.

Operational and stakeholder: Application troubleshooting; CRM support; process documentation; stakeholder communication; workforce and service coordination.

PROFESSIONAL EXPERIENCE

Database Administrator | Department for Education, SA | Apr 2025 - Present

- Support student-records database workflows, including manual data review, validation and cleansing to maintain accurate, consistent information.
- Investigate discrepancies and support standardisation of records for government reporting and information-quality requirements.
- Assist with application issues, controlled records access, archiving and audit-aware information-handling processes.

Public Administration and Information Officer | Department for Education, SA | Aug 2024 - Mar 2025

- Reviewed and maintained sensitive information across CRM, licensing and compliance-related administrative workflows.
- Verified supporting records and documentation, paying close attention to completeness, confidentiality and procedural requirements.
- Coordinated with internal stakeholders to resolve information issues and support operational reporting.

IT Support Consultant | University of South Australia | Mar 2022 - Jul 2024

- Provided user support for CRM and document-management applications, investigating reported software and hardware problems.
- Prepared and maintained technical guidance and repeatable support procedures.
- Worked with colleagues and service users to clarify incidents, coordinate troubleshooting and improve support consistency.

Store Manager | Oporto | May 2022 - Apr 2025

- Coordinated daily service operations, staff rostering, workforce allocation and payroll-cycle activities.
- Reviewed sales and operating information to support staffing, stock and service decisions.
- Trained and supported team members while maintaining service standards and addressing operational issues.

PROJECTS AND APPLIED ANALYTICS

Student Records Analysis | Excel, Power BI

- Cleaned and validated approximately 10,000 instrumental-music student records, including duplicate checks and information standardisation.
- Developed dashboard views presenting record completeness and data-quality indicators for reporting.

Supermarket Sales Optimisation Analysis | Python, pandas, Excel

- Prepared and analysed approximately 100,000 retail transactions, addressing duplicate records, missing values and inconsistent categories.
- Explored sales patterns, customer segmentation and forecasting; summarised findings using dashboards and visual reports.

Weather Forecasting and Data Pipelines | Python, ARIMA, Power BI

- Prepared and cleaned weather datasets, exploring short-term forecasting with ARIMA and Random Forest models.
- Evaluated forecasts with standard error measures and visualised time-series patterns using Power BI.

Reddit Sentiment and Mental Health Language Analysis | Python, NLTK, Tableau

- Processed social media text using natural-language techniques and evaluated classification of sentiment and mental-health-related language.
- Communicated research findings through dashboards; the project was not developed as a clinical assessment tool.

Electricity Consumption Forecasting | MATLAB, ANFIS

- Explored adaptive neuro-fuzzy inference systems for electricity-demand forecasting using historical consumption and weather-related inputs.
- Contributed to publicly available research describing the forecasting approach and its potential applications.

EDUCATION AND QUALIFICATIONS

Master of Data Science | University of South Australia | 2024

Bachelor of Computer Science and Technology | Sathyabama Institute of Science and Technology | 2020

Professional Year Program | Performance Education | Aug 2025 - Aug 2026

COMMUNITY INVOLVEMENT

Uni Mentor, University of South Australia (Mar 2022 - Mar 2024)

Volunteer, Adelaide Fringe Festival (Jan 2024 - Apr 2024)
